

# Porci's Ocean Patrol Activity Sheet

---

## Cloze Activity Solutions (level 1)

### Plastic Bags

Plastic bags can cause **HARM** to many marine animals in the ocean by tangling them up and looking like food. It can take up to 10-20 **YEARS** for a plastic bag to break up into tiny pieces of **PLASTIC** that stay around forever! Marine creatures such as seabirds, whales', fish, and **TURTLES** can think these small pieces of plastic are their food.

We can swap to **REUSABLE** bags as a good way to help the plastic problem!
