

# Porci's Ocean Patrol Activity Sheet

## Zooplankton - Cloze Activity (Level 1)

Using the words in the box, fill in the blank spaces to complete the sentences.

algae    microscopic    phytoplankton    chains  
copepods

Zooplankton play an important role in the ocean's food \_\_\_\_\_.

There are many kinds of zooplankton, some can be \_\_\_\_\_

while others can be large jellyfish. Zooplankton can also include little creatures like mysids, \_\_\_\_\_ and the larvae or babies of animals

such as urchins and crabs. Zooplankton eat food called

\_\_\_\_\_ which are tiny plant-like \_\_\_\_\_ who use the sun to

make their energy. The phytoplankton are so small that you need a

microscope to see them.
